Policy Proposal

Draft Document

This policy proposal has been accepted and has been implemented

The new RIPE Document is: [ripe-738](#)

Multiple Editorial Changes in IPv6 Policy

First version: [13 Jul 2019](#) - This version: 06 Nov 2019

Summary of Proposal:

This proposal suggests multiple editorial changes to the IPv6 Policy. The intent is to remove unnecessary text and simplify the policy.

There are multiple paragraphs in the IPv6 Policy that refer to “lack of experience” or “potential new changes” – things that are now obsolete, or clearly no longer the case.

Section 5.4.2 states that the policy was drafted at a time when there was no experience with IPv6 deployment, which is no longer the case. It does not make sense to have the RIPE NCC evaluate whether the end sites of an LIR’s End User require a shorter prefix than a /48.

Section 5.4.1 is reworded to mention a RIPE BCOP and 5.4.3 is deleted, as it is clear that operators need to assign some space for different parts of their own infrastructure.

IPv6 Address Allocation and Assignment Policy

Publication date: 16 Mar 2020

Abstract

This document defines registry policies for the assignment and allocation of globally unique IPv6 addresses to Internet Service Providers (ISPs) and other organisations. It was developed through joint discussions among the APNIC, ARIN and RIPE communities.

Contents

1. Introduction

1.1. Overview

2. Definitions

2.1. Internet Registry (IR)

2.2. Regional Internet Registry (RIR)

2.3. National Internet Registry (NIR)

2.4. Local Internet Registry (LIR)

2.5. Allocate

2.6. Assign

2.7. Utilisation

2.8. HD-Ratio

2.9. FLS
